companies and organisations are increasingly using machine translation to improve efficiency and cost effectiveness and then edit the machine translated output to create a fluent text that adheres to given text conventions this procedure is known as post editing translation and post editing can often be categorised as problem solving activities when the translation of a source text unit is not immediately obvious to the translator or in other words if there is a hurdle between the source item and the target item the translation process can be considered problematic conversely if there is no hurdle between the source and target texts the translation process can be considered a task solving activity and not a problem solving activity this study investigates whether machine translated output influences problem solving effort in internet research syntax and other problem indicators and whether the effort can be linked to expertise a total of 24 translators twelve professionals and twelve semi professionals produced translations from scratch from english into german and monolingually post edited machine translation output

for this study the study is part of the critt tpr db database the translation and monolingual post editing sessions were recorded with an eye tracker and a keylogging program the participants were all given the same six texts two texts per task different approaches were used to identify problematic translation units first internet research behaviour was considered as research is a distinct indicator of problematic translation units then the focus was placed on syntactical structures in the mt output that do not adhere to the rules of the target language as i assumed that they would cause problems in the monolingual post editing tasks that would not occur in the translation from scratch task finally problem indicators were identified via different parameters like munit which indicates how often the participants created and modified one translation unit or the inefficiency ineff value of translation units i e the number of produced and deleted tokens divided by the final length of the translation finally the study highlights how these parameters can be used to identify problems in the translation process data using mere keylogging data

these activities will foster participation and critical thinking in the classroom r jon frey director of speech activities aberdeen central high school sd cooperative group learning is a powerful approach and this book provides explicit ideas and guidelines stephanie van hover associate professor of social studies education university of virginia give your students the opportunity to think discover and learn together in social studies teamwork helps students strengthen individual retention improve performance and promote meaning making in the classroom to give adolescent minds practice in critical thinking the authors use their considerable teaching experience to present more than 40 problem solving activities that are ready for immediate use in the social studies classroom this second edition of catch them thinking in social studies demonstrates how to use collaborative learning strategies to fully engage students in meaning making cooperative problem solving activities for social studies grades 6 12 offers lessons in five areas of social studies instruction geography politics economics culture and history each activity includes background information clue cards objectives tasks and worksheets this updated edition helps teachers develop students decision making analysis and communication skills foster teamwork and interdependent learning construct cooperative problem solving activities using their own curriculum featuring current research and new activities this hands on resource helps teachers facilitate cooperative problem solving in social studies and provides teacher tips throughout the book

complex problem solving cps and related topics such as dynamic decision making ddm and complex dynamic control cdc represent multifaceted psychological phenomena in abroad sense cps encompasses learning decision making and acting in complex and dynamic situations moreover solutions to problems that people face in such situations are often generated in teams or groups this adds another layer of complexity to the situation itself because of the emerging issues that arise from the social dynamics of group interactions this framing of cps means that it is not a single construct that can be measured by using a particular type of cps task e g minimal complex system tests which is a view taken by the psychometric community the proposed approach taken here is that because cps is multifaceted multiple approaches need to be taken to fully capture and understand what it is and how the different cognitive processes associated with

it complement each other thus this research topic is aimed at showcasing the latest work in the fields of cps as well as ddm and cdc that takes a holist approach to investigating and theorizing about these abilities the collection of articles encompasses conceptual approaches as well as experimental and correlational studies involving established or new tools to examine cps ddm and cdc this work contributes to answering questions about what strategies and what general knowledge can be transferred from one type of complex and dynamic situation to another what learning conditions result in transferable knowledge and skills and how these features can be trained
