the main object of this study is to find out whether the differences between classical and medieval thinking about work occupations and technology are so significant that we are justified in speaking of a real break between antiquity and the middle ages in this connection or whether there is a possible

continuity of ideas from a comparative perspective five themes are being researched to shed light on this question in the first two chapters the author looks into the traditional view of negative ideas about work in antiquity chapter three subsequently deals with monks and their attitude towards labour in chapter four the place of the so called artes mechanicae in medieval classifications of knowledge is being studied in chapter five we find an analysis of twelfth century sermons ad status these three chapters principally deal with the question whether christianity brought about a change in attitude towards work

includes part 1 number 2 books and pamphlets including serials and contributions to periodicals july december

the book investigates the relationship between ecosystem services es and spatial planning and explores potential means of integrating the two concepts to support the decision making process in addition it presents case studies demonstrating the outcomes limitations opportunities and further new developments in es assessment mapping for planning support then it describes the restart from ecosystem services res methodology which is aimed at integrating es into the planning process using an ecological balance and at promoting new planning parameters for the transformation areas res ensures the inclusion of es in planning processes using the incremental measures of limiting mitigating and compensating soil sealing and land take process promoting operational strategies in applying it the implementation of res is associated with strategic environmental assessment and provides valuable support in the definition of strategies across the entire planning process especially for the evaluation of alternative scenarios

this comprehensive pocket guide covers a wide range of psychosocial problems that a nurse might encounter when treating patients hospitalized in medical surgical settings

this book bridges the fields of health care and data to clarify how to use data to manage pandemics written while covid 19 was raging it identifies both effective practices and misfires and is grounded in clear research based explanations of pandemics and data strategy the author has written an essential book for students and professionals in both health care and data while serving the needs of academics and experts the book is accessible for the general reader eileen forrester ceo of forrester leadership group author of cmmi for services guidelines for superior service rupa mahanti explores the connections between data and the human response to the spread of disease in her new book she recognizes the value of data and the kind of insight it can bring while at the same time recognizing that using data to solve problems requires not just technology but also leadership and courage this is a book for people who want to better understand the role of data and people in solving human problems laura sebastian coleman author of meeting the challenges of data quality management in contrast to the 1918 spanish flu pandemic which occurred in a non digital age the timing of the covid 19 pandemic intersects with the digital age characterized by the collection of large amounts of data and sophisticated technologies data and technology are being used to combat this digital age pandemic in ways that were not possible in the pre digital age given the adverse impacts of
