of canada

this volume completes the nonpasserine species and contains accounts for the diurnal
birds of prey through woodpeckers

this much awaited final volume of the birds of british columbia completes what some have
called one of the most important regional ornithological works in north america it is the
culmination of more than 25 years of effort by the authors who with the assistance of
thousands of dedicated volunteers throughout the province have created the basic
reference work on the avifauna of british columbia volume 4 covers the last half of the
passerines and describes 102 species including the warblers sparrows grosbeaks
blackbirds and finches the text builds upon the authoritative format of the previous
volumes and is supported by hundreds of full colour illustrations including detailed
distribution maps unique habitat shots and beautiful photographs of the birds their nests
eggs and young in addition a species update lists and describes 27 species of birds new to
the province since the first three volumes were published the book concludes with
synopsis the birds of british columbia into the 21st century which synthesizes data and
information from all four volumes and looks at the conservation challenges facing birds in
the new millennium the four volumes in the birds of british columbia provide
unprecedented coverage of the region s birds presenting a wealth of information on the
ornithological history regional environment habitat breeding habits migratory movements
